Rino-Fix® External Nasal Splints

Aluminium | Aluminium Plus | Thermo

Made in Istanbul since 2009

Aluminium External Nasal Splint

Rino-Fix® | Small, Medium and Large Size Options

Rino-Fix® Aluminium External Nasal Splint is designed to provide external support to the nasal area after rhinoplasty, septoplasty and nasal trauma. Its lightweight structure, ease of application and wide range of colours address different needs and preferences.

Key Features

- **External support:** Helps support the nasal structure after nasal surgery or trauma.
- **Protective structure:** Helps protect the nasal area from external impact.
- **Shape support:** Helps support the nasal structure in the intended position.
- **Easy application:** Designed for practical application.
- **Colour options:** Available in a range of colours.
- **Size options:** Small, Medium and Large.

Usage note: It is recommended to use the splint together with the dorsal pad to help prevent it from sticking to the skin.

Colour Range

Other colours are available on request.

Sizes

Size	Small	Medium	Large
Dimensions (mm)	35 x 55	40 x 60	45 x 65

Included with Every Product

Aluminium Plus External Nasal Splint

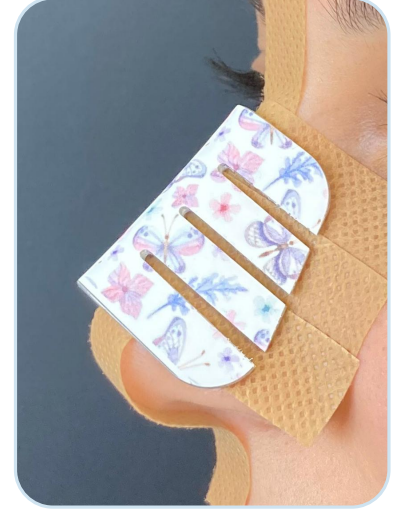

Rino-Fix® | Slotted Design | Small, Medium and Large Size Options

Rino-Fix® Aluminium Plus is an aluminium external nasal splint developed with a slotted design to support conformity to the contour of the nose. Available in a range of colours and patterns, it is used for external support and protection after nasal surgery or in cases of nasal trauma.

Key Features

- **Slotted design:** Helps the splint conform to the contour of the nose.
- **External support:** Provides external support to the nasal area after nasal surgery or trauma.
- **Protective structure:** Helps protect the nasal area against external factors and impact.
- **Wide range of colours and patterns:** Available in solid colours, glitter, holographic and printed designs.
- **Size options:** Small, Medium and Large.

Usage note: Use together with the dorsal pad to help prevent the splint from sticking to the skin.
